

Review from Netherlands
REVIEW OF HIGH FIDELITY CABLES PRODUCTS
(Power Cables, Interconnects, Speaker Cables and Power Conditioners)
Dear Rick,

As promised I hereby send you a review of your products now they are "settled in" (around 4 months in use by now).

My equipment consists of the following products:

Furutech E60TPe Power Distributor (Virtual Dynamics Testament 2.0 Power Cable to HMS outlet)
Innuos Zenith MK2 Music Server (High Fidelity Cables Reveal Power Cable)
T&A DAC 8 DSD DAC (High Fidelity Cables Reveal Power Cable)
ASR Emitter I Exclusive + Accu Integrated Amplifier (High Fidelity Cables Reveal Power Cable)
Martin Logan ESL 11a Speakers (Audioquest Thunder Power Cables)
REL R528 Sub (Virtual Dynamics Testament 2.0 Power Cable)
Accessories: High Fidelity Cables MC 0.5 Power Conditioner (1x) and MC 0.5 Helix+ PC (2x)

Interconnects: High Fidelity Cables CT-2 (RCA) replacing Virtual Dynamics David 2.0
Speaker Cables: High Fidelity Cables CT-2 replacing Virtual Dynamics David 2.0

The Reveal Power Cables were replacing Virtual Dynamics Power 3.

I find it very difficult to bring under words the way your products brought my system to a much higher level, but I'll try!

What I hear:

- lots of (micro)detail, hearing just a lot of sounds never heard before (also from older albums!)
- far more dynamic sound with incredible speed
- very clear/transparent sound
- very big soundstage (deep and wide, layered) with lots of air around the instruments
- very deep, fast and dry bass (never heard drums like this!!)
- lovely midrange giving a lot of body to voices, with very nice timbre
- very sweet, open and never fatiguing treble

In fact, your products just better every aspect of sound, I believe my equipment is sounding at least 2 or 3 classes higher now.....they just let me hear what the set is capable of.
When I'm listening in the dark (or just close my eyes) at high sound levels it's like visiting a live gig.....

I love listening to Symphonic Rock and when a lot of instruments are played together it's still possible to follow every instrument separately.....it's just amazing.....so much detail and still musical

Conclusion: wonderful stuff!!!!

Sincerely,
Tom Otter
